## GROOMING OF SLOPES

All opened slopes are groomed every night. When it snows, they are groomed again in the morning. In case slopes need to be groomed during opening hours, there is a risk of collision between skiers and the snow groomers. Therefore, grooming operations in the daytime only take place when strictly necessary. Additional grooming runs do not fall into this category. Observe the groomers' warning light and horn and keep a safe distance. In fresh snow, moguls inevitably appear over the course of the day. We thank you for your understanding.

## WINCH GROOMING

Some slopes are prepared with the winch. As a result, the cable dragging the groomer up crosses the slope. Please be aware of all barriers. The slopes are closed from 4:30pm to 8am every day. During those hours, no protection measures are in place! There is a risk of injury from grooming equipment and the grooming process: snow groomers, snow cannons, ruts, winch ropes, uncovered cables and the hoses from the snowmaking system. When night skiing, follow the instructions at the respective resort.

## SNOWMAKING

Be aware of the snow-making system and the snow cannons throughout the entire area. Anywhere around the snow cannon, visibility may be lower and the snow quality may be different.
